RE: Miller Salvage Site/Update

Dear Mr. Wolfe:

This letter informs U.S. EPA that grass has been replanted at the Miller Site (Site) and, as the attached photographs demonstrate, grass is growing across the Site. The replanting was done as a result of our conversation last fall after submission of the "Sawdust Pile Removal Final Closure Report" in October 2008. We committed to replant grass this Spring as a final closure step. Now that the replanting work is completed, we believe all work under the U.S. EPA approved "Sawdust Pile Removal Workplan" for the Site is complete. We respectfully request that U.S. EPA provide written notice of completion of work under that Workplan and the Administrative Settlement Agreement and Order on Consent for Removal Action, dated December 4, 2007.

We appreciate your and Mark Durno's work on this project and trust that you will call me if you have any questions about this letter and my request for written confirmation so that we may close our file.

Sincerely,

Chris Winans

cc: Mark Durno, U.S. EPA
